

**NEW DISCOVERING MATHEMATICS  
SECONDARY 3 (GRADE 9)  
NON-CALCULATOR PRACTICE**

Name: \_\_\_\_\_ ( ) Class: \_\_\_\_\_ Date: \_\_\_\_\_

**Chapter 1 – More About Quadratic Equations and Quadratic Functions (Worksheet A)**

---

**1** Solve the following equations by the factorisation method.

(a)  $x^2 + 14x + 48 = 0$

(b)  $2x^2 + x - 28 = 0$

(c)  $3x^2 - 48 = 0$

(d)  $6x^2 - 23x + 7 = 0$

**2** Find the possible values of  $b$  if each of the following expressions is a perfect square.

(a)  $x^2 + bx + 4$

(b)  $x^2 + (b + 3)x + 49$

**3** For each of the following, express them in the form  $(x + p)^2 + q$  or  $-(x + p)^2 + q$ , where  $p$  and  $q$  are constants.

(a)  $x^2 + 4x + 4$

(b)  $x^2 - 2x + 3$

(c)  $-x^2 - 3x - 2$

(d)  $-x^2 + 9x - 3$

**4** Solve the following equations by the factorisation method.

(a)  $x^2 - 6x = 4x - 21$

(b)  $4x(x - 4) = 7(x - 4)$

(c)  $(x + 12)(x - 3) = 9x$

**5** Solve the following equations.

(a)  $\frac{x+2}{3} = \frac{2}{x+7}$

(b)  $\frac{1}{x+2} - \frac{1}{x-5} = \frac{7}{10}$

(c)  $\frac{8-x}{x+7} + \frac{x+4}{3+x} = 4$

(d)  $\frac{5}{x+1} - \frac{x+10}{x^2-x-2} = 15$

- 6 Solve the following equations by the complete the square method, leaving your answer in the form  $x = p \pm \sqrt{q}$ , where  $p$  and  $q$  are constants. State so if the equation has no solutions.
- (a)  $x^2 + 4x = 36$
  - (b)  $(x + 3)(x + 2) = 9$
  - (c)  $(x - 2)^2 = 5x - 2$
- 7 For each of the following,
- (i) find the  $x$ -intercepts and the  $y$ -intercept,
  - (ii) sketch the graph of the function.
- (a)  $y = (x + 2)(x - 1)$
  - (b)  $y = -(x + 6)(x - 4)$
- 8 For each of the following,
- (i) find the line of symmetry and the coordinates of the turning point,
  - (ii) sketch the graph of the function.
- (a)  $y = x^2 + 5$
  - (b)  $y = -(x + 2)^2 - 1$
- 9
- (a) Draw the graph of  $y = x^2 + 2x - 1$  for  $-3 \leq x \leq 2$ .
  - (b) Hence, solve the equation  $x^2 + 2x - 1 = 0$  graphically.
- 10
- (a) Draw the graph of  $y = -2x^2 - x + 2$  for  $-3 \leq x \leq 3$ .
  - (b) Hence, solve the equation  $-2x^2 - x + 2 = 0$  graphically.
- 11 The general term of a sequence is  $T_n = n^2 + an + b$
- (a) Find the values of  $a$  and  $b$  if both the 4th term and the 6th term are 0.
  - (b) Hence, find the possible values of  $p$  if the  $p$ th term is 8.
- 12 The difference between two positive numbers is 4. The sum of the squares of the two numbers is 106. Let the smaller number  $x$ .
- (a) Form an equation in  $x$  and solve it.
  - (b) Hence, find the sum of the two numbers.

- 13** Martin and Nikki participated in 10 km run.  
Martin ran at an average speed of  $x$  km/h.
- Write down an expression, in terms of  $x$ , for the number of hours he took to complete the race.
  - Nikki ran at an average speed which was 5 km/h less than Martin's speed. Write down an expression, in terms of  $x$ , for the number of hours she took to complete the race.
  - The difference between their times taken to complete the race was 60 minutes. Write down an equation to represent the given information and show that it reduces to  $x^2 - 5x - 50 = 0$ .
  - Solve the equation and find Nikki's average speed for the run.

- 14** In the diagram,  $ABC$  is a right-angled triangle with angle  $ABC = 90^\circ$ ,  $AB = x$  cm,  $BC = (x + 7)$  cm and  $AC = (3x - 2)$  cm.

- Form down an equation in  $x$  and show that it reduces to  $7x^2 - 26x - 45 = 0$ .
  - Solve the equation  $7x^2 - 26x - 45 = 0$ .
  - Hence, solve the equation in (b) and find the length of the longest side of triangle  $ABC$ .
- 15** The price of element  $E$  was  $x$  dollars per kg in 2022.  
Mr. Koh, a scientist, spent \$600 on element  $E$  in 2022.
- Write down an expression in terms of  $x$  for the amount of element  $E$ , in kg, received by Mr. Koh.
  - In 2023, the price decreased by \$4 per kg and Mr. Koh spent \$672 on element  $E$ . Write down an expression in terms of  $x$  for the amount of element  $E$ , in kg, received by Mr. Koh for his 2023 purchase.
  - The difference in between the amount of element  $E$  received by Mr. Koh in the two years is 2 kg.  
Form an equation in  $x$  and show that it reduces to  $x^2 - 40x - 1200 = 0$ .
  - Solve the equation in (c) and find the amount of element  $E$  Mr. Koh received in 2022.
